DEVELOPMENT METHODOLOGY & AI INTEGRATION

- Four-Stage Execution Pipeline: Discover (client goals & requirements) !' Plan (architecture & design direction) !' Build (clean code & responsive design) !' Launch (testing & DNS deployment).
- Modern AI Workflow: Practical integration of OpenAI Codex, Claude Code, and Antigravity to accelerate prototyping, verify responsive integrity, and troubleshoot complex code while maintaining strict human-led craftsmanship.
- Professional Integrity: Honest presentation of skills, zero fabricated certifications or inflated proficiency scores.
